Re: 3GPP2 TSG-X Response to OMA MWG LS on Correcting Extended Replace and Cancel

Dear Jerry,

This correspondence is in response to your LS dated 3 February 2005 regarding "Correcting Extended Replace and Cancel Functionality".

Please be advised that the TSG-X MMS AdHoc has decided to adopt the referenced CR and to incorporate those changes in our MMS Stage 2 document (X.P0016-200). The TSG-X MMS AdHoc also noticed what appears to be an oversight in the CR: the first paragraph in Section 8.1.13.2 should have been deleted, to be consistent with MM1_cancel.RES now being an acknowledgement.

For your convenience, the updated section 8.1.13.2 is shown below, with the first paragraph in a strikethrough font:

> 8.1.13.2 Abnormal Operation
>
> ~~In this case the MMS User Agent shall respond with an MM1_cancel.RES encapsulating a status which indicates the reason the request for cancelling was not accepted, e.g. the MM is not available, denied by a user.~~
>
> If the MMS User Agent does not provide the MM1_cancel.RES, the MMS Relay/Server should be able to recover. In this case, the MMS Relay/Server may retransmit the MM1_cancel.REQ to the MMS User Agent.

We thank you for providing the CR to us.

Regards,

Betsy Covell
Chair, 3GPP2 TSG-X
