19 February 2009

Mr. Linyi Tian, Chair, OMA DM  
[tianlinyi@huawei.com](mailto:tianlinyi@huawei.com)

### **Re: New Version of OMA DM Enabler**

Dear Mr. Tian,

Thank you for your liaison dated November 30, 2009, and for your kind initiative to consult with us in a timely fashion regarding requirements for the planned Version 2.0 of the DM Enabler.

3GPP2 specifications include references to OMA DM 1.2, specifically:

[S.R0101-0 v1.0](#) “IOTA Device Management for cdma2000 Systems - Stage 1 Requirements”

[C.S0064-0 v1.0](#) “IP Based Over-the-Air Device Management (IOTA-DM) for cdma2000 Systems”

Due to existing specifications and implementations, it is important to maintain backward compatibility as OMA DM enabler evolves toward Version 2.0. We ask that you consider this as a fundamental requirement. We will provide additional input, should it surface in the course of any upgrades to these specifications, specifically as it pertains to the stated focus of OMA DM 2.0, namely converged / multimode devices. In addition to that, companies with membership in both organizations and participation in OMA DM can serve to strengthen technical exchange in a more expeditious fashion, as OMA DM 2.0 development progresses.

We value continued fruitful cooperation between our two organizations.

Regards,

山崎徳和

Nick Yamasaki  
Chair, 3GPP2 TSG-S
