Template Version:23 February 2015 (Dot not modify)

1 Overview

oneM2M TP thanks SA2 for their LS on “Northbound SCEF API standardisation” in S2-172742.

SA2 is asking whether the requirements identified in Section 8..3 of v2_0_3 of oneM2M TR-0024, for the four API use-cases indicated in the LS (Section 8.5, 8.7, 8.8, and 8.9) are considered stable.*

We confirm that the content of all clauses 8.*.3.3 (Key Issues and Requirements) of TR-0024 are stable and we recommend using v.2.1.1 (or later) of the document. oneM2M work in progress will be focused on the oneM2M-specific solutions not affecting the interface to the 3GPP network.
