

Broadband Forum Liaison To:

Seth Newberry, OMA General Manager <oma-liaison@mail.openmobilealliance.org>

From:

Lincoln Lavoie, Broadband Forum Technical Committee Chair <lylavoie@iol.unh.edu>

Liaison Communicated By: Jason Walls, Broadband Forum Broadband User Services Work Area Co-Director <jason@qacafe.com>

Date: June 14, 2018

Subject: Announcing the release of the User Services Platform to OMA

We're writing to inform you that the Broadband Forum has recently launched version 1.0 of its User Services Platform (USP), that can be found at <http://usp.technology>. This work represents an evolution of TR-069 (CWMP) that is flexible, scalable, secure, and applicable to a vast number of use cases both legacy and new. This includes more advanced Wi-Fi management and control scenarios, smart hubs and IoT, and more. Our work continues with certification and interoperability test plans, and soliciting organizations that have been diligently working on building standardized IoT service objects to gather data to incorporate into the USP data models. We are planning plugfest activities in Q3 of 2018.

We specifically wanted to inform those organizations who were currently aware of TR-069, have standardized its use, or have incorporated it into their own architecture, as well as those who have begun work on standardizing IoT service objects. We'd be happy to provide more information, and will be hosting additional information sessions and webinars in the future. Please reach out to us with any questions or feedback you may have.

Sincerely,

Lincoln Lavoie,
Broadband Forum Technical Committee Chair
