30 September 2005

Peter Thompson  
Chair, OMA Device Management

**Re:** 3GPP2 C.S0064-0 (IOTA-DM for cdma2000 systems) Status

Dear Mr. Thompson;

In response to your February 15<sup>th</sup>, 2005 liaison statement; 3GPP2 TSG-C would like to thank OMA DM for reviewing the proposed publication text for C.S0064-0 (IP-Based Over-the-Air Device Management -- IOTA-DM). The comments included in your liaison statement were incorporated during the ballot review process of C.P0064-0 IOTA-DM.

TSG-C would like to inform OMA DM that C.S0064-0 was approved for publication in 3GPP2. C.S0064-0 defines the Management Objects (MOs) and security parameters for operation within 3GPP2 systems compatible with OMA DM and C.S0016-C (Over-the-Air Service Provisioning and Parameter Administration for 3GPP2 Systems).

In your liaison statement, you indicated that the procedures for registering MOs by external entities as part of the Open Mobile Naming Authority (OMNA) were still being developed. 3GPP2 TSG-C requests any updated guidance or description of procedures to register the MOs and 3GPP2-specific processes defined within C.S0064-0.

3GPP2 TSG-C looks forward to future co-ordination between TSG-C and OMA DM, and would be interested in being informed of new OMA DM work streams that may have impact on 3GPP2 operations.

Regards,

Byung K. (BK) Yi  
Chair, 3GPP2 TSG-C
