San Francisco, CA 94129-0920

Dear Alastair

The ISMA has been made aware that there is an urgent need for ISMA to complete its work on its ISMACrypt 1.1. With the exception of editorial corrections and resolution of minor elements of the specification is complete and only awaits any comments you or others might have in response to reviewing the attached ISMACrypt 1.1 text.

We hope you find the specification suitable as a reference for your work. We anticipate its final approval and publication following any recommendations you might make. Our next opportunity is December 8-9 at our 19<sup>th</sup> Forum in Cupertino, California.

We look forward to hearing from the OMA.

Sincerely,

Peter Schirling  
ISMA Liaison Chairman
