December 2006

TITLE: ISMA Liaison To OMA

Editor: Yuval Fisher <yuval@envivio.com>

In our previous liaison we indicated our intention to have a draft of ISMACryp 2.0 as a result of our December meeting. This draft is now ready and we attach it to this liaison for your review. This draft incorporates ISMACryp 1.1 and extends it in important ways that are in line with your BCast specification.

In the interest of industry convergence we are working on aligning ISMACryp and OMA PDCF at the instigation of our members some of whom are also OMA members. We understand that you are also working in OMA on this convergence, and we trust that you share our goal and we would like to assure you of our willingness to help in anyway we can.

We appreciate your comments as we hope to finalize ISMACryp 2.0 for public review at our upcoming March 2007 Europe meeting.
