Re: Support of 3GPP2-OMA Work Item dependencies per OMA-TP-2004-0085R1

Dear Kevin,

TSG-S WG3 Program Management Team (PMT) has begun preparation of Work Item dependencies between OMA and 3GPP2. In order to assist in that preparation, TSG-S asks assistance from OMA Requirements WG in accordance with section three from document OMA-TP-2004-0085R01 (copy attached). In **bold** text below, I have extracted "bullet 3, a)" from the document. TSG-S PMT requests the latest versions of the OMA Work Programme plus the three lists.

- **Bullet 3, a)**

  3GPP2 SC is advised that the Technical Plenary has approved, that on a quarterly basis (or more frequently if required or requested), the current
  - **OMA Work Programme**
  - **list of approved Work Items**
  - **list of draft/approved requirements documents**
  - **list of other draft/approved specifications**

  consistent with the OMA Openness Policy, shall be communicated to 3GPP2 TSG-S WG3 Program Management Team (PMT) by the OMA Requirements WG. These two groups are now encouraged to execute this approved action.

Additionally, TSG-S PMT has enclosed a draft table which maps terminology per the **bold** text below, also extracted from OMA-TP-2004-0085R01.

- **Bullet 3, b)**

  3GPP2 SC is advised that as part of the relationship between 3GPP2 TSG-S WG3 Program Management Team (PMT) and the OMA Requirements WG, the Technical Plenary has approved that in order to facilitate improved understanding between the organisations, a common terminology or mapping of terminology (e.g. RD = Stage 1) shall be created and communicated.
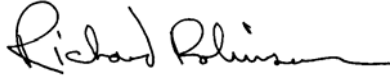

Please review the draft table for accuracy, adding or correcting as necessary to meet the intent of "Bullet 3, b)". Please forward any comments or changes to TSG-S Chair.

OMA Term	3GPP2 Term
Requirements Document (RD)	Stage 1
Requirements Document (RD)	Systems Requirement Document
Architecture Document (AD)	Stage 2 Specification
Specification	Stage 3 Specification
Work Item Document (WID)	Work Item (WI) Worksheet
OMA REL Work Programme	3GPP2 Workplan (MS Project) (and work summary reports, other)
Service Enabler (collection of RD, AD, Spec, IOP, other)	Work Item (WI) [The work items in the release plans collect the related specifications and reports from a service perspective.]

Thank you for your assistance

.

Regards,

Richard Robinson
Chair, 3GPP2 TSG-S
